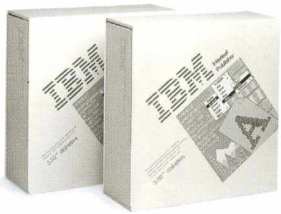
IBM Interleaf Publisher

Yours for a song!

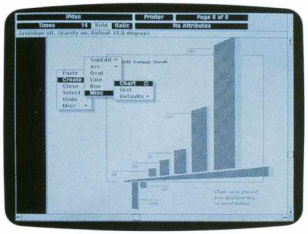
IBM

For the price of a single player, you can have the whole orchestra.



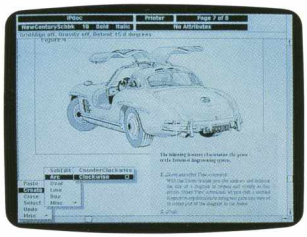
Thanks to the "Yours for a song" promotion, you can buy IBM Interleaf™ Publisher at an incredibly low price from June 6 through August 31, 1989.

The publishing ensemble that does it all



It's a word processor. A page layout system. A presentation package. A business graphics package. An image editing system. IBM Interleaf Publisher is all of the above. And more.

Which gives you unprecedented freedom to create anything from simple memos to fully orchestrated presentations and books with high-quality, professional results.

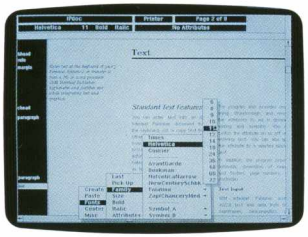


It comes with its very own combination of diskettes to get you up and publishing in no time. You'll find an Explorer Diskette, a self-guided tour highlighting the most powerful features of IBM Interleaf Publisher, in addition to your User's Guide and Administration Guide. You'll also be able to become productive instantly using Point & Type—a series of commonly used templates for business paperwork, such as memos, organizational charts and presentations.

Of course, these are just a few of the reasons to buy IBM Interleaf Publisher. There are more.

Now, IBM Interleaf Publisher performs while taking less byte out of your memory

In the past, if you wanted one of the most advanced desktop publishing systems, you needed up to 6Mb of RAM. But now, thanks to the IBM Interleaf Publisher, you only need 2Mb!



With IBM Interleaf Publisher, a little memory goes a long way. And that's something worth remembering.

Become a virtuoso with IBM Interleaf Publisher's pop-up menus

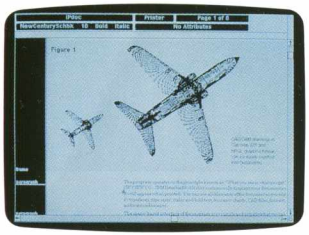
Using IBM Interleaf Publisher is as simple as selecting an option on a pop-up menu. Pop-up menus, relevant only to what you're doing, appear wherever you position the mouse-controlled cursor. Start with a spreadsheet, for example; then, with a click of the mouse, transform it into a pie chart, then to a bar chart, then to a line graph—instantly!

Bravo capabilities

The following are just a few of the many features and functions that make IBM Interleaf Publisher the ideal publishing ensemble to meet all your needs.

Pagination occurs automatically and continuously, so that your document is always current in format, sequence and length. Headers and footers are automatically applied and updated, as well.

Graphics Cabinet provides you with clip art—including arrows, flowchart symbols and maps—that you can edit and customize to suit your office needs.



Revision tracking features offer editorial assistance by allowing you to mark revised passages in the margin as well as underline and strike through text.

Text editing functions enable you to revise, rearrange, insert or delete single characters or entire blocks of copy with just a few clicks of your mouse.

Text formatting functions give you the capability to justify, align right or left, center or set your text in multiple columns. You can also preformat template documents or alter any format in seconds.

Microdocument feature allows you to compose complex pages of text, images and graphics whose layouts differ from the document as a whole.

Import capability permits you to integrate data, text, image and graphics files from a variety of sources for inclusion in your document. It also allows you to include encapsulated PostScript® files that you have generated with other programs or systems.

Diagraming features give you the capability to create illustrations for your document. You can draw freehand with a mouse or produce line art using system-generated lines, boxes, arcs, curves, ovals and polygons.

Daily performances

Why not see IBM Interleaf Publisher masterfully perform for yourself?

Your IBM Remarketer will be happy to give you an in-store demonstration of this powerful desktop publishing system. Ask today.

And remember.

The "Yours for a song" promotion enables you to purchase IBM Interleaf Publisher at an incredibly low price.

But don't delay. This is a limited engagement.
